- **allergens:**
- **glucose:**
- **antigens:**
- **antibodies:**

Date: **Thursday, September 26th, 2024.**

Key Num

Topic: **Definite and indefinite Articles**

We use indefinite articles (a/an) when we are mentioning something for the first time or talking about something that's not specific.

We use a before words starting with a consonant and an before words starting with a vowel (a, e, i, o, u).

We use the definite article (the) when and our listener/reader already know which specific thing we're talking about-either because we're already mentioned it or because there is only one of it (e.g., with superlative adjectives). We also use it with the names of mountain ranges, rivers, seas, oceans, and groups of islands or stars.
